

ShibGO

Whitepaper

1. Introduction

Hello there! Pull up a chair, sit back and enjoy the ride as we introduce you to the furriest, funniest and most fantastically entertaining token on the Binance Smart Chain (BSC), the ShibGO token! This isn't just any old crypto project - it's a full-blown, meme-powered rocket aiming for the moon, captained by our very own Shiba Inu dog, ready to guide you through the strange and wonderful world of cryptocurrency. Buckle up and prepare for takeoff - next stop, MOON!

2. Token Information

2.1 What's ShibGO?

ShibGO is more than just a token, it's a movement, a playful journey and a nod to the mischievous Shiba Inu, our mascot who's always ready for a good laugh. We're keeping things light and embracing the meme-filled culture of the internet.

Our tokenomics are no joke, though:

Name: ShibGO

Symbol: ShibGo

Total Supply: 1,000,000,000

Decimals: 9

2.2 Tax? More like Fun-ds!

ShibGO implements a tax strategy, or as we like to call it, our FUN-ding mechanism. Here's how it works:

Buy Tax: 1% (All going into the “Let’s make ShibGO famous” fund aka marketing)

Sell Tax: 4% (2% converted into sweet BUSD and reflected back to holders, 2% going into our marketing treasure chest)

This FUN-ding mechanism is designed to put a leash on massive trading while rewarding our loyal ShibGO pack who stick around!

3. How to Buy ShibGO?

Fetch your very own ShibGO tokens by following these steps:

Download a BSC-compatible wallet like Trust Wallet or MetaMask.

Purchase BNB or BUSD and deposit them into your wallet.

Access the DApp browser in your wallet and visit PancakeSwap.

In PancakeSwap, select the BNB or BUSD pair, then input the ShibGO contract address.

Set your slippage to at least 5%, select the amount you want to purchase and hit Swap!

Confirm the transaction and woof! You're now a proud member of the ShibGO pack.

Always remember, investing in cryptocurrencies is a bit like playing fetch - fun but unpredictable. Do your homework and be sure you're ready to play!

4. Token Distribution

4.1 ShibGO's Fun Pack

ShibGO's token distribution is designed to ensure everyone gets to join in the fun:

PinkSale Launch: 50% (500,000,000 tokens)

This big chunk of ShibGO tokens will be available for everyone during our PinkSale launch. We believe in a fair start, giving everyone the chance to jump into the fun right from the get-go.

Liquidity Pool: 30% (300,000,000 tokens)

A considerable portion of ShibGO tokens will be locked in the liquidity pool. It will ensure there's enough tokens for trading, keeping our token stable and the game rolling.

Marketing & Development: 15% (150,000,000 tokens)

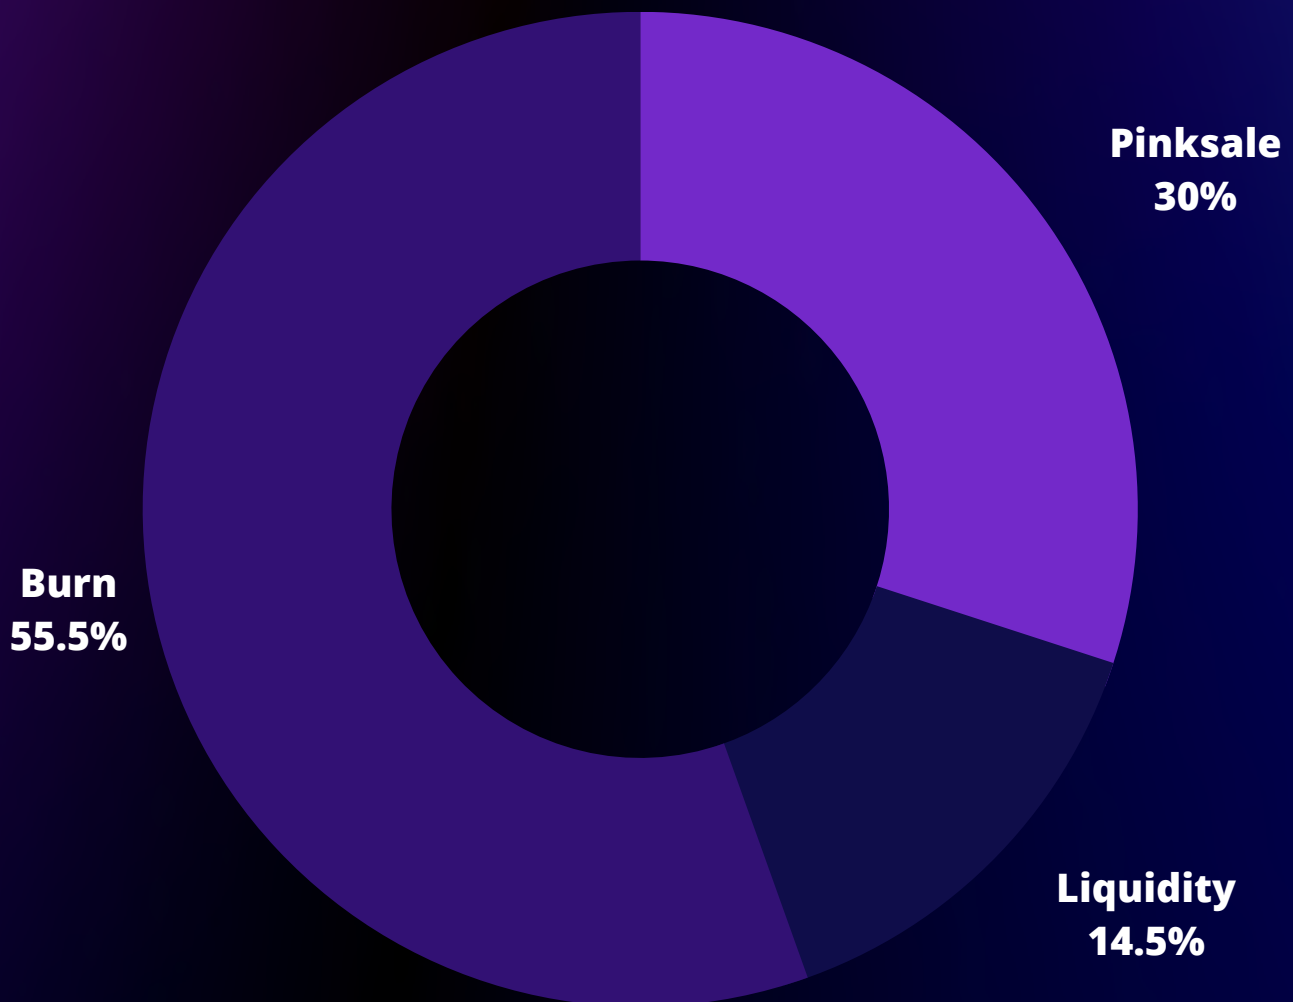

This portion will be allocated to marketing ShibGO and its future development. These tokens will be used for promotional campaigns, partnerships, and further improving ShibGO. We want the world to hear about us and join the fun!

Community Airdrops: 5% (50,000,000 tokens)

As a way to thank our community for their support, 2% will be reserved for airdrops. This can happen at any time, so keep an eye out!

With this distribution model, we aim to ensure a balanced and sustainable token economy. The model has been designed with a long-term vision, facilitating the growth of our project and ensuring the maximum benefit for our community.
